Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Shirley E. Brown and Trina J. Duffin provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

Digest

U.S. Agricultural Exports Rise 17 Percent (see p. 2). Agricultural exports rose \$2.5 billion during the first 5 months of fiscal year (FY) 1989. Export value totaled \$17 billion during Oct. 1988-Feb. 1989 compared with \$14.6 billion during the same 5 months a year earlier. Larger grain exports accounted for much of this gain. Increased corn exports to the Soviet Union and substantially higher prices helped boost Oct.-Feb. grain exports by \$2.3 billion compared with the same period in FY 1988.

California Is Top Export State in FY 1988 (see p. 6). California led all States in agricultural exports in FY 1988, with fruits, nuts, and vegetables accounting for 65 percent of California's shipments. California exported more of each of these commodities than other States. Total exports of \$3.39 billion were the highest for a single State since Iowa's \$3.41 billion in 1982. The top 10 exporting States--California, Iowa, Illinois, Kansas, Texas, Nebraska, Minnesota, Indiana, Ohio, and Missouri--averaged nearly a \$500-million increase from FY 1987.

Central America Exports \$1.1 Billion of Agricultural Products to the United States in CY 1988 (see p. 14). Central America's share of U.S. agricultural imports fell from 9 percent in 1979 to 5 percent in 1988. The region has diversified its exports to the United States in recent years and has gained a greater share of U.S. fruit and vegetable imports.

U.S. Exports, as Share of Production, Increase in FY 1988 (see p. 18). The exported share of U.S. agricultural production increased to 18 percent in FY 1988, its highest level in 4 years and 4 points above the 1987 level. An increase in exports was accompanied by a decrease in output. The 18-percent share for total agricultural exports was below the record 24 percent set in FY 1981. The wheat market contributed substantially to the FY 1988 increase as the share of wheat production exported increased from 52 percent to 73 percent.

U.S. Agricultural Exports Rise 17 Percent

Agricultural exports rose \$2.5 billion to \$17 billion during the first 5 months of FY 1989 compared with the same period the year before. Larger grain exports accounted for much of this gain (fig. 1). Increased corn exports to the Soviet Union and substantially higher prices helped boost Oct.-Feb. grain exports \$2.3 billion. Exports of animal products were \$409 million higher, led by a 43-percent increase in meat exports. Exports declined for tobacco, soybeans, and, especially, cotton, which alone fell \$275 million.

U.S. corn exports nearly doubled in value during the first 5 months of FY 1989, growing \$1.2 billion from year-earlier levels to \$2.6 billion. Corn export volume increased 4 million tons to 21 million tons, accounting for a third of all agricultural export volume. Prices climbed, too, following drought-reduced crops in the United States and Argentina. At \$124 per ton, the average export price of corn was nearly 50 percent higher than during the same period in FY 1988, and the highest for any period since FY 1985.

Total Soviet grain production fell 16 million tons in 1988 as reduced coarse grain production offset increased wheat production. Oct.-Feb. corn exports to the Soviets grew 6 million tons to 7.8 million tons. Exports to Mexico grew by 554,000 tons. However, exports to East Asia and Southeast Asia fell 2.5 million tons, including a 985,000-ton decline in shipments to Japan and a 523,000-ton decline to South Korea.

U.S. wheat exports, at \$2.3 billion, were nearly 50 percent above year-earlier levels. Volume declined 7 percent, but the average price of each ton exported rose from less than \$100 to nearly \$160. Wheat exports were more than \$300 million higher to China and South Asia, \$59 million higher to Latin America, and slightly higher to the Middle East and Southeast Asia. The volume of shipments declined to Eastern Europe, North Africa, and Other East Asia. Higher prices meant the value of exports to North Africa and Other East Asia was above year-earlier levels.

Sales to Mexico, Japan Boost Animal Product Exports

Animal product exports rose \$409 million because of increased exports to Mexico, Japan, and the EC and despite lower exports to Canada and South Korea.

Shipments to Mexico rose \$297 million, with gains recorded for most products. Live cattle exports to Mexico increased 759 percent, growing \$65 million. U.S. sheep, swine, and meat exports to Mexico were also higher, by \$100 million, and poultry product exports to Mexico climbed \$56 million, divided between meat and eggs. Although consumer demand in Mexico remained weak because of falling real incomes and rising unemployment, Mexican Government efforts to slow inflation have led to increased imports, which can slow price increases by sustaining supplies.

U.S. exports of animal products to Japan rose \$227 million from year-ago levels as exports of beef and other meats grew. Meat exports to Japan rose \$180 million, surpassing previous years' growth rates. Favorable exchange rates and import liberalization had raised U.S. meat exports to Japan by an average 26 percent since FY 1985 compared with a 45-percent gain in FY 1989. Following a new commitment to increased liberalization, Japan increased its import quota for beef by 60,000 tons in 1988, raising the Apr. 1988-Mar. 1989 quota to 274,000 tons. Much of the increase in Japan's imports has occurred in grain-fed beef. Since the United States is the largest producer and exporter of grain-fed beef, much of Japan's increased imports have come from the United States, raising the U.S. share of Japan's imports.

Soybean and Cotton Exports Decline

U.S. soybean exports fell \$263 million during the first 5 months of FY 1989. Export prices averaged 37 percent higher following a drought-reduced U.S. crop, but the volume of shipments fell more than 4 million tons. The volume of soybean exports fell as world consumption and U.S. market share declined. European soybean crush hit a 10-year low during the first half of FY 1989 as higher world prices reduced consumption. Also, soybean production reached a record high in South America, helping drive the U.S. soybean share of world trade to its lowest level in at least three decades.

U.S. cotton exports fell \$275 million to \$761 million. Global growth in mill use of cotton slowed compared with recent years, and U.S. prices were less competitive with overseas exporters. Most major markets were lower, dropping about \$100 million each to the EC-12 and Japan. Exports to South Korea fell \$31 million. Shipments to China reached \$46 million compared with none during Oct.-Feb. FY 1988. (Stephen MacDonald, Commodity and Trade Analysis Branch)

Figure 1
U.S. agricultural exports, 1982-89

Oct.-Feb. Imports Sustain Momentum

U.S. agricultural imports during Oct. 1988-Feb. 1989 totaled \$9 billion, unchanged from the same period a year ago. Imports for all of FY 1989 are forecast to match FY 1988's record of \$21 billion. Competitive imports (products also grown in the United States) of \$6.4 billion were 5 percent above a year ago. Seasonal factors boosted imports of live cattle, meats, fruits, and vegetables in January and February. Noncompetitive imports fell \$200 million to \$2.6 billion, despite the seasonal surge in coffee and cocoa imports. Coffee imports picked up in January and February after a sluggish early start. Cocoa product imports--cocoa beans, cocoa butter, and chocolate preparations--are generally at their highest levels in January and February.

California Is Top Export State in FY 1988

California was the leading U.S. agricultural export State in FY 1988 based on ERS estimates. Fruits, nuts, and vegetables accounted for 65 percent of California's exports. California was the largest supplier of these crops and of seeds. Total exports of \$3.39 billion were the highest for a single State since Iowa's \$3.41 billion in 1982. California increased its exports by about 19 percent in 1988 compared with an overall U.S. increase of 27 percent. Yet, California exports only 17 percent of its agricultural output compared with a national average of 18 percent. The farm value of California's agricultural exports amounted to \$2.7 billion, while its cash receipts from farm marketings totaled \$15.6 billion.

The average increase in exports from FY 1987 to FY 1988 for the top 10 States--California, Iowa, Illinois, Kansas, Texas, Nebraska, Minnesota, Indiana, Ohio, and Missouri--was nearly \$500 million. Kansas had the largest increase at \$815 million.

Commodities that performed well in export markets included cottonseed, wheat, sunflowerseed oil, cotton, rice, feed grains, nuts, live animals and meat, animal fats, feeds and fodders, and soybeans. All commodities except peanuts showed value increases in FY 1988.

State agricultural export estimates are based on the assumption that if a State contributes a certain percentage of U.S. production for each commodity, it receives the same percentage in export revenues. Additional information, such as estimated feed use by State, wheat shipments by type, and Customs data by port of export is incorporated into the estimating procedure when appropriate.

The 50-percent increase in the value of wheat exports in FY 1988 affected the wheat-growing States in different ways. The 41-percent upturn in U.S. wheat export volume was primarily due to a 110-percent increase in Hard Red Winter (HRW) wheat shipments. As a result of this increase and a 9-percent increase in HRW wheat export prices (compared with an average increase of 7-8 percent for all wheat classes), HRW

took a record 56-percent share of all U.S. wheat exports, up from 42 percent the previous year. Since Kansas is the largest producer of HRW wheat, it gained the most in FY 1988, surpassing North Dakota, which is primarily a Hard Red Spring (HRS) wheat and durum wheat producer, as the largest export State. While most States increased their export sales of wheat, Oklahoma, Montana, Texas, Colorado, and Nebraska improved their positions within the top 10 States. These States produced mainly HRW wheat, although Montana also produces a substantial amount of HRS wheat.

The degree of concentration accounted for by the 10 leading export States varied from 67 percent for feeds and fodders to 100 percent for rice, sunflowerseeds, and tree nuts. The concentration ratio for a given commodity measures the combined value of exports from the top 10 States divided by the total export value. The ratio is then multiplied by 100 to convert it to a percent. The following list shows the concentration ratios of the top 10 States by commodity in FY 1988 expressed as a percentage:

Sunflowerseeds	100
Rice	100
Tree nuts	100
Tobacco	98
Fruits	96
Cotton	95
Vegetables	86
Feed grains	85
Soybeans	83
Animal fats	81
Wheat	79
Hides and skins	76
Dairy	75
Live animals and meat	74
Poultry	74
Seeds	74
Feeds and fodders	67

Ten States accounted for 59 percent of total U.S. agricultural exports, reflecting the degree to which many States specialized in the production of export products. Thirty-four States exported at least \$200 million of agricultural commodities in FY 1988. (Stephen R. Milmoie, Commodity and Trade Analysis Branch)

Central America Exports \$1.1 Billion of Agricultural Products to the United States in CY 1988

Central America's share of the U.S. agricultural import market fell to 5 percent in 1988, its lowest level in 26 years. Central America comprises Belize, Guatemala, Honduras, El Salvador, Costa Rica, Nicaragua, and Panama. The peak share was 9-10 percent in the late 1970's. The steady rise in the value of Central American exports to the United States that characterized the 1960's and through 1977 changed in the late 1970's (fig. 2). Since that time, the export pattern has fluctuated. Falling coffee prices, declining U.S. sugar import quotas, and a U.S. embargo on shipments of most agricultural commodities from Nicaragua helped cause the recent decline. Central American export revenue has been tied to the fortunes of coffee, sugar, bananas, and beef, which are vulnerable to the price swings that have occurred with greater frequency since 1976.

Despite volatility in the coffee and sugar markets, Central American prospects are improving because of diversification. Melons, pineapples, fresh vegetables, orange juice, seeds, cut flowers, and nursery products are part of a growing share of other commodities that now account for 16 percent of Central America's shipments to the United States (table 7, fig. 3).

Quotas Restrain Traditional Export Commodities

Bananas, coffee, sugar, and beef accounted for 95 percent of U.S. imports from Central America in 1970. The International Coffee Organization (ICO) establishes annual export quotas for member nations, including the Central American countries. Meanwhile, the United States imposes country-by-country quotas on sugar imports and an overall quota on beef imports. Thus, Central American exporters are subject to import or export quotas on three of the top four export commodities.

Very few countries shipped sugar to the United States before 1960. Cuba, the Philippines, Puerto Rico, the Virgin Islands, and U.S. cane and beet producers accounted for over 95 percent of sugar marketed in the United States. Cuba alone accounted for up to a third of the total. In 1960, the United States imposed an embargo on Cuban sugar, and, as a result, Central American sugar deliveries to the United States jumped from \$2.4 million in 1959 to \$20.5 million in 1964, reaching \$337.1 million in 1980.

The United States again imposed country-by-country import quotas in 1982, and by 1988 the U.S. quota for

Central American sugar had been reduced to 125,000 tons from a peak of 869,000 tons in 1977. This 86-percent drop nearly matched an overall decline in the U.S. quota of 83 percent over the same period. Six of the seven Central American countries each shipped over 100,000 tons at least once during 1972-83 (Guatemala shipped a record 331,000 tons in 1976), so the quota cut affected each country's exports.

The United States also imposes a quota on beef imports but not a country-by-country quota. Since Central America accounts for only 6 percent of U.S. meat imports, primarily fresh beef under quota, shipments are not restricted.

Central America plays a marginal role in the world coffee market compared with Brazil and Colombia but still exports 450,000-600,000 metric tons annually. With about a third of its coffee exports going to the United States, Central America has a 20-25 percent share of the world's largest coffee market. In 1988, the United States imported \$325 million of coffee from Central America, down 40 percent from the previous year.

Fruits And Vegetables Lead Export Shift

Central America supplied 92 percent of all 1988 U.S. pineapple imports, 24 percent of melon imports, and 18 percent of pea imports. Table 8 shows each country in Central America and its primary agricultural exports to the United States in 1988. Costa Rica, the region's largest exporter of agricultural commodities to the United States, is also the region's most diversified exporter. Each country varies in the degree to which it depends on a single export commodity. El Salvador, for example, relied on coffee for 87 percent of its 1988 agricultural exports to the United States, while Costa Rica's primary agricultural export to the United States, bananas, accounted for 49 percent of its total exports. Figure 4 shows each of the seven Central American countries and its agricultural exports to the United States in 1970 and 1988. Each of the countries except Nicaragua increased its exports to the United States in 1988.

Throughout the Caribbean Basin, there is a movement away from the more traditional exports to the United States, such as sugar, coffee, and cocoa, and toward alternative crops, such as fruits and vegetables. For example, 88 percent of the Caribbean's agricultural exports to the United States in 1970 were sugar, cocoa, coffee, and molasses. These products made up 61 percent of total shipments in 1988. (Stephen R. Milmoe, Commodity and Trade Analysis Branch)

U.S. Exports, as Share of Production, Increase in FY 1988

The exported share of U.S. agricultural production increased to 18 percent in FY 1988, its highest level in 4 years. An increase in exports was accompanied by a decrease in output. Exports increased 15 percent in volume, from 129 million tons in FY 1987 to 148 million in FY 1988, while production fell an estimated 11 percent. The 18-percent share for total agricultural exports was below the record of 24 percent set in FY 1981 but above the 14 percent figure of the previous 2 years (fig. 5).

The wheat market contributed substantially to the FY 1988 increase, as the share of wheat production exported increased from 52 percent to 73 percent. Not since FY 1973, a year of large wheat sales to the USSR when exports accounted for 89 percent of wheat production, has the proportion of wheat exported been that high. U.S. wheat sales to the USSR in FY 1988, all of which were generated by the Export Enhancement Program (EEP), reached 8.8 million tons. This represented 21 percent of total U.S. wheat exports in FY 1988 compared with 30 percent in FY 1973.

Commodity Exports

The exported share of production extremes ranged from 73 percent for wheat to 1 percent for pork. Of 19 selected commodities, 5 showed exports of at least 50 percent of production. Exports of wheat, hops, almonds, soybeans, and rice ranged from 53 to 73 percent of production. Exports of peanuts, apples,

poultry, beef, and pork exports accounted for less than 15 percent of production.

Eighty-two percent of U.S. agricultural production is consumed within the United States. When a commodity like wheat, rice, and soybeans relies regularly on exports for over half its income, events in the international market can affect the domestic market. For example, 88 percent of cotton production was exported in FY 1984, but only 16 percent in FY 1986. In 1984, cotton stocks were drawn down by 5 million bales. In 1986, they increased by 5 million bales. If a commodity market is flexible, such a large shift can be absorbed without large movements in price. During the 1982-87 marketing years, cotton prices at the farm level were not influenced much by export share.

Export Prices Adjusted to Farm Level

To determine how much of overall U.S. agricultural production is exported, USDA estimated the farm-level value of exports. Table 9 shows farm value as a percentage of export value of between 82 and 85 percent (col. 1). This value was estimated using 55-60 percent of the value of exports (col. 2). Most of the commodities listed have had a minimal amount of processing, and therefore, the farmer receives a large portion of the export price. For the commodities not listed (approximately 40 percent of the total), such as meats, fruits, nuts, and vegetables, substantial value is often added after the commodity leaves the farm level. Therefore, to account for farm-to-export processing and marketing margins, USDA reduces the overall export value by 20 percent to estimate farm value. (Stephen R. Milmoie, Commodity Trade and Analysis Branch)

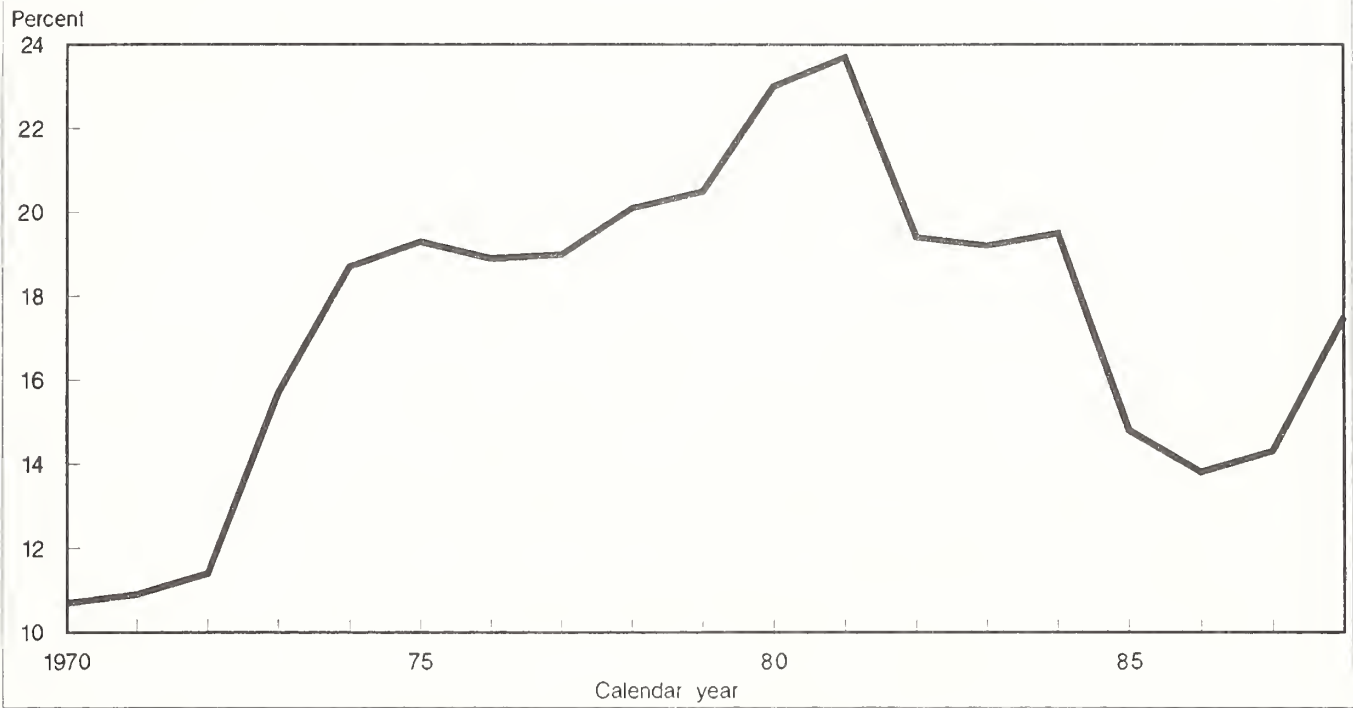

Table 9--Export-to-farm level price adjustment, selected commodities, FY 1985-88 1/

Fiscal years	Farm price (weighted) as a percent of export price	Combined export value of selected commodities as a percent of total exports
<u>Percent</u>		
1985	81.8	65.8
1986	85.0	57.9
1987	82.0	55.5
1988	84.1	58.5

1/ Corn, grain sorghum, barley, wheat, rice, soybeans, soybean meal, soybean oil, cotton, and tobacco.

Share of U.S. agricultural production exported, 1970-88

INDEX OF APPENDIX TABLES

Exports

Table	Page
A-1 U.S. agricultural exports: Quantity and value by commodity	A-2
A-2 U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-February 1987/88 and 1988/89, and February 1989	A-4
A-3 U.S. wheat exports: Quantity (1,000 MT) by destination, October-February 1987/88 and 1988/89	A-62
A-4 U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-February 1987/88 and 1988/89	A-63
A-5 U.S. soybean exports: Quantity (1,000 MT) by destination, October-February 1987/88 and 1988/89	A-64
A-6 U.S. agricultural exports: Value (1,000 dol.) by destination, October-February 1987/88 and 1988/89	A-65

Imports

B-1 U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-February 1987/88 and February 1988 and 1989	B-1
B-2 U.S. agricultural imports: Quantity and value by commodity	B-2
B-3 U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-February 1987/88 and 1988/89, and February 1989	B-4

Prices

C-1 Foreign currency units per U.S. dollar	C-1
C-2 Domestic and foreign wheat prices	C-2
C-3 Corn, sorghum, rice, and cotton prices	C-2
C-4 U.S. and northern European soybean and product prices	C-3
C-5 U.S. import prices	C-3

Get these timely reports from USDA's Economic Research Service

These periodicals bring you the latest information on food, the farm, and rural America to help you keep your expertise up-to-date. Order these periodicals today to get the latest facts, figures, trends, and issues from ERS.

Agricultural Outlook. Presents USDA's farm income and food price forecasts. Emphasizes the short-term outlook, but also presents long-term analyses of issues ranging from international trade to U.S. land use and availability. 11 issues annually. 1 year, \$22; 2 years, \$43; 3 years, \$63.

Farmline. Concise, fact-filled articles focus on economic conditions facing farmers, how the agricultural environment is changing, and the causes and consequences of those changes for farm and rural people. 11 issues annually. 1 year, \$11; 2 years, \$21; 3 years, \$30.

National Food Review. Offers the latest developments in food prices, product safety, nutrition programs, consumption patterns, and marketing. 4 issues annually. 1 year, \$10; 2 years, \$19; 3 years, \$27.

Economic Indicators of the Farm Sector. Updates economic trends in U.S. agriculture. Each issue explores a different aspect of income and expenses: national and State financial summaries, production and efficiency statistics, costs of production, and an annual overview. 5 issues annually. 1 year, \$12; 2 years, \$23; 3 years, \$33.

Rural Development Perspectives. Crisp, nontechnical articles on the results of new rural research and what those results mean. 3 issues annually. 1 year, \$9; 2 years, \$17; 3 years, \$24.

The Journal of Agricultural Economics Research. Technical research in agricultural economics, including econometric models and statistics focusing on methods employed and results of USDA economic research. 4 issues annually. 1 year, \$7; 2 years, \$13; 3 years, \$18.

Foreign Agricultural Trade of the United States. Updates the quantity and value of U.S. farm exports and imports, plus price trends. 8 issues annually. 1 year, \$20; 2 years, \$39; 3 years, \$57.

Situation and Outlook Reports. These reports provide timely analyses and forecasts of all major agricultural commodities and related topics such as finance, farm inputs, land values, and world and regional developments. Each *Situation and Outlook* title costs 1 year, \$10; 2 years, \$19; 3 years, \$27. Titles include:

<i>Agricultural Exports</i>	<i>Cotton and Wool</i>	<i>Oil Crops</i>	<i>Vegetables and Specialties</i>
<i>Agricultural Income and Finance</i>	<i>Dairy</i>	<i>Rice</i>	<i>Wheat</i>
<i>Agricultural Resources</i>	<i>Feed</i>	<i>Sugar and Sweeteners</i>	<i>World Agriculture</i>
<i>Aquaculture</i>	<i>Fruit and Tree Nuts</i>	<i>Tobacco</i>	<i>World Agriculture Regionals</i>

Also available: *Livestock and Poultry*: 1 year, \$15; 2 years, \$29; 3 years, \$42.

Add 25 percent for shipments to foreign addresses (includes Canada). Sorry, no refunds.
